Chassis Versions

What do all the letters mean?

These are the basic letters used

- B** - school bus chassis
- C** - flat face cowl for the addition of a delivery body
- E** - built for export
- F** - fire truck chassis
- L** - light weight or weight reduced by using aluminum components
- P** - platform chassis (single axle straight truck)
- R** - right hand drive. This designation was started in 1964 but right hand drive available prior as option.
- S** - six wheel chassis (tandem axle)
- T** - tractor chassis
- X** - severe or extr~~e~~me service chassis

Combine any of the basic letters to get a different chassis

- PC** - flat face cowl platform chassis
- LST** - light weight six wheel tractor chassis
- SX** - six wheel extr~~e~~me service chassis
- STE** - six wheel tractor chassis for export
- RX** - right hand drive extr~~e~~me service chassis

These are some odd versions

- BD** - school bus - no idea what the D means. Little more than 100 built 1955-1956
- EWX** - don't have a clue on the letters but the picture shows a mean looking B83 built in 1965 with 3 drive axles
- SX-C** - six wheel extr~~e~~me service chassis, may have been built in Canada
- SX-M** - six wheel extr~~e~~me service chassis, no idea what M stands for
- T-HS** - tractor, don't know about HS
- T-M** - tractor, don't know about M
- TPB** - tractor piggy back

Now the fire truck combinations! The good guys at the Mack Museum and Harvey Eckart had to do some "head scratchin" on these

- CF** - fire truck with Chrysler Corp. drive train
- FA** - aerial ladder fire truck
- FC** - fire truck chassis without fire body. This designation started in 1965
- FCD** - fire truck chassis with diesel engine without fire body
- FD** - fire truck with diesel engine. This designation started in 1964
- FMD** - don't have a clue. Only built in 1963
- FSW** - six wheel (tandem axle) fire truck. This designation started in 1958 for fire trucks but had been used in trucks prior to the B model series.
- FT** - fire truck tractor. This designation started in 1965 but fire truck tractors were also built before this date.
